TRAKnet DPM Earns Surescripts Certification — Now ARRA Certification Eligible

St. Paul, MN — May 13, 2010 — BioMedix Vascular Solutions, Inc., announced today the Surescripts certification of TRAKnet DPM Advanced Practice Management Solutions. Completing the latest Surescripts certifications positions TRAKnet DPM as a premier product, offering the latest e-prescribing features. These features include the ability to send electronic prescriptions, respond to refill requests, lookup and compare a patient's prescription history, display pharmacy benefits and drug formulary, and suggest therapeutic alternatives. In addition, TRAKnet DPM has also been improved with other features such as a commercial drug database and drug decision support, which are necessary to comply with the pending 2011 American Recovery and Reinvestment Act (ARRA) certification.

"Surescripts certification for e-prescribing has taken TRAKnet DPM, an already invaluable EHR and Practice Management solution for Podiatric Physicians, and expanded its capabilities to add even more value for our customers," said Scott Leum, Chief Software Technologist for BioMedix.

TRAKnet DPM, the expandable, all-in-one practice management platform that enables seamless operation while increasing efficiency and reducing costs, was designed by and for Podiatric Physicians. TRAKnet DPM incorporates billing, charting, scheduling, e-prescribing and inventory management to allow effortless transition from scheduling to encounters and claims while interfacing with the full BioMedix suite of software and hardware products between physician offices, vascular labs and hospitals.

"By attaining Surescripts certification to add the e-prescribing feature to TRAKnet DPM, we continue to demonstrate our commitment to supporting Podiatric Physicians with the best tools," said John Romans, President and CEO of BioMedix.

About BioMedix

BioMedix Vascular Solutions, Inc. provides the only integrated suite of hardware, software and online services designed to cost-effectively detect Peripheral Arterial Disease (P.A.D.) and Chronic Venous Insufficiency (CVI). Vascular specialists, primary care providers, hospitals and health systems use our products to identify these patients. Our devices and Health Information Technology (HIT) software reduce mistakes, provide data for sound analysis, build practice revenue and streamline reimbursement while providing a platform that supports the continuum of care and increased quality outcomes. For more information about BioMedix products, call 877-854-0014 or log on to www.BioMedix.com.

About Surescripts

Surescripts, based in St. Paul and Alexandria, Minnesota, is the country's largest electronic prescribing provider of giving healthcare providers secure, electronic access to prescription information that can save their patients' lives, improve efficiency and reduce the cost of healthcare for all. The Surescripts network connects these prescribers to all of the nation's major chain pharmacies and over 10,000 independent pharmacies nationwide.
